EXPERIENCE

05/2016 – present

FIS ILOG

Grafenrheinfeld

Frontend Web Developer

- Designing and implementing MVC web applications with the SAPUI5 framework, that are requesting data from a OData REST API
- Improved the process and speed of creating new SAPUI5 applications with a self created scaffolding tool/generator
- Added browserify to install, bundle and easily integrate modules from npm in our applications
- Implemented a build system based on gulp
- Increased code quality by supporting ES6 and using the newest JavaScript features
- Support older browsers through enhancing the build system with a transpiler, which can translate newest JavaScript ES6 syntax into older syntax
- Improved performance of the initial loading times, by adding a task which can minify file size
- Built responsive user interfaces for usage on different devices
- Created native web container apps with cordova and implemented a bar code scanner
- Integrating new employees into web development
- Provided a documentation in English and wrote unit-tests with qunit
- Added a JavaScript code quality tool into our build system
- Self-study in react, nodejs, express, python, android opencv and many more

05/2015 – 05/2016

FIS INFORMATIONSSYSTEME UND CONSULTING GMBH

Grafenrheinfeld

ABAP Developer

- Learned the programming language ABAP
- Realized notification features on our internal ticket system

02/2014 –02/2015

WEBFACTOR GMBH

Würzburg

Android Application Developer

- Designed and created community android applications, that were requesting data from a php backend with SSL
- Created Plain Old Java Objects (POJOs) and mapped json responses with gson
- Realized offline usage
- Implemented push notifications and worked with google maps
- Provided a documentation in English and wrote unit-tests with junit

EDUCATION

2010 – 2013

BERUFSFACHSCHULE FÜR IT- BERUFE WÜRZBURG

Apprenticeship

specialized computer scientist in application development
